RE: Reconnaissance Level Characterization Report (RLCR) for Building 334, T334B, and T334D - Concurrence

Dear Mr. Legare:

The Colorado Department of Public Health and Environment, Hazardous Materials and Waste Management Division has reviewed the RLCR for Building 334, T334B, and T334D, Revision 0 dated October 11, 2002, received on November 1, 2002. Based on the information contained in this RLCR and additional information provided at meetings on 12/4/02 and 12/11/02 and documented in Contact Records, we are hereby concurring with the Type 1 designation for Building 334, T334B, and T334D.

Although the majority of the concrete slab for B334 may be recycled, as previously agreed the concrete slab in the oil storage room of B334 will be properly disposed as sanitary waste and not recycled.

Other concerns that may be identified from the additional chemical sampling that has been performed can be resolved utilizing the consultative process.

If you have any questions regarding this correspondence please contact me at (303) 692-3367 or David Kruchek at (303) 692-3328.

Sincerely,

  
Steven H. Gunderson
